

src/hammerhead/control  
\_stack/tiburon\_commander  
/include/tiburon\_commander  
/commander\_window.h

```
graph BT; A["src/hammerhead/control_stack/tiburon_commander/src/commander_window.cpp"] --> C["src/hammerhead/control_stack/tiburon_commander/include/tiburon_commander/commander_window.h"]; B["src/hammerhead/control_stack/tiburon_commander/src/tiburon_commander.cpp"] --> C;
```

The diagram illustrates a file dependency structure. At the top is a header file box (shaded gray) containing the path `src/hammerhead/control_stack/tiburon_commander/include/tiburon_commander/commander_window.h`. Below it are two source file boxes. The left box contains `src/hammerhead/control_stack/tiburon_commander/src/commander_window.cpp` and the right box contains `src/hammerhead/control_stack/tiburon_commander/src/tiburon_commander.cpp`. Blue arrows point from each source file box up to the header file box, indicating that both source files include the header.
